DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-13, 15-18, 20-23 and 25-37 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 2, 5, 11, 13, 14, 17 and 21 of U.S. Patent No. 6,861,961. Although the conflicting claims are not identical, they are not patentably distinct from each other because it would have been obvious to one skilled in the art to construct the fabric

of patent '961 by using a weaving process or by a knitting process since these methods are well-known in the art for being used to produce woven electrical cables.

3. Claim 19 is rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 2, 5, 11, 13, 14, 17 and 21 of U.S. Patent No. 6,861,961 in view of Ross et al. (4,143,236). Claim 19 additionally recites the insulating fibers having a larger dimension than the conducting fibers. Ross et al. discloses a conducting fabric comprising insulating fibers (20) and conducting fibers (16, 18), wherein the insulating fibers have a larger dimension than the conducting fibers. It would have been obvious to one skilled in the art to modify the fabric of patent '961 by providing the insulating fibers with dimension larger than the conducting fibers as taught by Ross et al. to improve the tensile strength of the cable.

Response to Arguments

4. Applicant's arguments with respect to claims 1, 25, 35-37 have been considered but are moot in view of the new ground(s) of rejection.
